**The MoleMax Range**

- Clinical Audit and Quality Control, earn qualifying CPD points.
- Automatic scoring analysis aided with the universally recognised ABCD rule & 7 Point Checklist.
- Systems to suit the budget and needs of any size medical practice from entry level systems up to advanced multi-function operations.
- A cost effective purchase that will not only improve patient care, but grow your business.
- Portable versions available for mobile clinics.
- Special camera design allows ease of software operation using the mouse controls located on the back of the camera.
- Unique patented light source with cross polarization illumination technology used worldwide, giving a faster, clean & efficient digital examination with no immersion oil required.
- Compare, trend and monitor skin lesions with the patient database as well as a detailed diagnostics modules.
- Build patient confidence by presenting their lesions visually on a monitor with high magnification.
- First in the market in 1997, over 2,500 systems installed in over 50 countries worldwide.

**MoleMax HD**

*See More - See Better - Full High Definition Quality*

- The MoleMax HD system camera with auto-focus for 3 modes of imaging: Macro, Close Up and DELM (Dermoscopy mode).
- Micro adapter with unique patented light polarisation enabling 20x, 30x & 40x zoom (optional adapter available with 100x zoom).
- Improve your productivity with:
  - Quick & simple followup/trending,
  - Automatic alerts and reminders,
  - Multi-user work environment,
  - staff assisted imaging sessions.
- Automatic or manual lesion scoring.
- Generate reports or email images.
- Increased patient participation with two 23” flatscreen color LCD monitors with HD resolution.
- A specially designed MoleMax HD equipment trolley for easy mobility with integrated Windows 7 PC.
- 2.5 inch screen on back of camera providing live video with digital Image transfer via HDMI plus mouse controls on handle (pictured left).
- Optional features available include Microsoft Surface PRO tablet for Mobile MoleMax use, Touch Screen LCDs and superfast USB 3.0 backup.
**MoleMax 3**

All the features of the MoleMax II unit, plus the following:
- Standard Auto Mole Scoring software module
- Standard Mole Mapping (auto mole detection) software module
- High Resolution Digital Camera with additional hand held portable dermatoscope, providing live camera feed to the PC screen
- Optional Trichoscan Hair Growth Monitoring software module
- Optional Total Body Mapping Stand with customised light source
- Optional Non-polarised (oil use) Macro Camera adapter allowing 20x, 30x and 40x zoom (adapter with 60x, 80x and 100x zoom also available)

**MoleMax II**

All the features of the base MoleMax 1 unit plus the following:
- A unique hand-held colour video microscopic camera (CCD) with a fixed 30x zoom lens system, light polarisation devices, fiber optics & integrated track-stick, allowing for penetration of 0.15mm below the skin surface
- High magnification polarised adapter (non-oil) 60x, 80x & 100x zoom
- Additional hard disk space, RAM & card reader
- Optional software modules including Trichoscan for hair growth monitoring, Auto Mole Scoring & Mole Mapping (auto mole detection)

**MoleMax I PRO**

All the features of the MoleMax 1, plus:
- High Resolution Digital Canon EOS SLR Camera with additional hand held portable dermatoscope, providing live camera feed to the PC screen
- Optional Total Body Mapping Stand with customised light source

**MoleMax, DermDOC & PhotoMAX Software**

*(Standard/Optional Features Vary Between Systems)*

- Real Time/Overlay Follow Up
- Automatic Scoring Module
- Total Body Mapping Sessions
- CosMAX Cosmetics Module
**MoleMax I**

- The MoleMax I system camera with auto-focus and motor zoom as well as additional close-up imaging
- DELM adapter with unique patented light polarisation enabling 20x, 30x and 40x zoom
- A PC unit with power supply, automatic camera mode detection, video processor, frame grabber electronics, and DVD-R/CD-R for data backup
- A 20” flatscreen colour LCD monitor with 1280x1024 resolution
- A specially designed MoleMax I equipment trolley for easy mobility
- The MoleMax Version 8.0 standard software package with All Skin Library, Comparative Follow Up, Expertizer Scoring (ABCD Rule and 7 Point Rule), CosMax Simulation, Automatic Backup, Live Body Mapping and Trending & Clinical Audit

**DermDOC Digital Skin Imaging System**

*A Portable MoleMax*

- Portable macro and micro skin imaging based on leading world-wide MoleMax technology.
- USB connection to your existing Windows XP, Vista or 7 desktop/notebook PC.
- No immersion oil or contact gels required for digital dermoscopy.
- Easily connects to your existing desktop or notebook with single, multiple or network use.
- User friendly system allows equipment to be operated from camera during the examination.
- Analyse, compare, trend & monitor with our detailed patient data-base & diagnostics modules, plus an all skin library of pre diagnosed skin conditions.
- Compact in size, A4 footprint, for easy portability and storage.

**MoleMax, DermDOC & PhotoMAX Software** *(Standard/Optional Features Vary)*

- All Skin Diagnosis Library
- Automatic Mole Count/Compare
- Trending and Monitoring
- Expertizer Plus Scoring Aid
PhotoMAX Software
Ask for your Free 30 Day trial CD

PhotoMAX is a medical program package which features:
- Localise patient images easily using the Body Map
- Monitor the development of a lesion over time
- An All Skin diagnostic atlas with clinical references
- Integrated diagnostic aids such as the widely used ABCD rule & the Seven Point rule

Customised Patient Reports: Print images, patient data and history along with results from the scoring module.

Backup and Export: Easy backup of patient history, or transfer or share databases between PCs in your clinic.

PhotoMAX PRO
Advanced Digital Dermoscopy Set

The new PhotoMax PRO portable system connects to your own computer and can be used on the go.

- Charger Docking Station & hard case transport box
- Software included, Windows XP, 7/8 compatible
- High resolution Canon EOS SLR digital camera
- Polarized ELM Lens including rechargeable battery pack
- Canon SLR Macro Lens for clinical imaging
- Online image via USB link to your computer
- ELM polarized interface for high resolution Dermoscopy with or without immersion fluid, 15x magnification
- Live image display on monitor or on the camera
- Diagnosis support support using scoring module
- Real time follow up examinations
- WIFI or WIRED Versions available.

Total Body Mapping Stand

The adjustable rail can slide up and down with lock in intervals approximately every 10cm, allowing for images to be taken from the patients feet to their head. The set measurements make follow up mapping sessions easy.

The universal camera stand allows for most digital cameras to be attached, including our integrated Canon 15MP digital SLR camera which feeds images directly into the MoleMax or PhotoMAX PRO system. The live image on screen allows for a quick screening with minimal mouse clicks.
DermaFOTO V2

HD Image Capture Dermatoscope

The all new DermaFOTO V2 is a high definition hand-held skin imaging device designed to give you a quicker examination with increased patient participation.

DermaFOTO features:
- Skin conditions displayed on optional monitor
- Up to 4,000 images stored in memory
- Polarised light for no-oil imaging
- Non-Polarised (Oil) imaging (PRO model)
- PC software (Plus Models)
- LCD with live image preview on screen
- Docking Station for charging and PC transfer
- Portable & light, fits in your pocket

4 MODELS AVAILABLE!
- DermaFoto (Polarised - Dry Model only)
- DermaFOTO Plus (Polarised + Software)
- DermaFOTO Pro (Wet & Dry Modes)
- DermaFOTO Pro Plus (Wet + Dry + Software)

DermLite Cam  Dermatoscope & Camera in One

DermLite Cam is a state-of-the-art digital dermoscopy camera designed to enable anyone in your office to capture repeatable high-resolution dermoscopic & clinical images—quickly and easily. It is a portable, professional tool for taking polarized and non-polarized images of superb quality, without the frustratingly complicated menus inherent in most digital cameras.

Captured images are saved to an SD card and displayed on its high-resolution touch screen. Image review including double-tap zooming and image deleting, are two intuitive features. DermLite Cam is fast. Switching between cross-polarized and non-polarized modes required a click and switching between dermoscopic and clinical shooting merely requires you to slide a lever.

While its smooth exterior—virtually void of crevices—is largely made from strong, lightweight and precision-machined aluminum components, the contoured grip and rugged bottom are made from a soft & grippy material.
DermLite DL100  The Original

DermLite DL100 is the original choice for oil-free pocket epiluminescence microscopy. The DL 100 allows enhanced visualisation of pigmented skin lesions for the early detection of melanoma and dysplastic nevi.

With its compact size, lightweight design and long-life lithium power, the possibilities are virtually infinite.

DermLite Carbon  Button Activated Polarisation

DermLite carbon provides maximum control over lesion visualisation by separately activating two groups of light-emitting diodes (LED), each with distinct cross and linear polarization.

DermLite Carbon’s 16 LEDs are powered by the same highly efficient, long-life lithium battery that powers the original DermLite DL100.

DermLite II Pro HR  Brightest Pocket Dermatoscope

DermLite II PRO HR is the world’s brightest pocket dermoscope. DermLite II PRO HR redefines the best in portable skin imaging, with the most light in any polarised dermoscope and the largest lens in its class.

The DermLite II PRO HR’s permanent cross-polarisation and high light output result in images of stunning contrast, excellent detail rendition and increase depth of focus when you attach a camera via the product’s built-in threaded connection.

DermLite DL3 / DL3-N Optical Excellence

Precision-engineered and crafted from solid aluminum, it is the first handheld DermLite to integrate a 25mm four-element lens, offering greatly reduced optical distortion and a sharper image across the field of view.

- Fully retractable faceplate spacer design and focusing mechanism.
- Glass faceplate with 10mm scale,
- Eye piece to improve the contrast of the image & reduces internal reflections caused by ambient lighting.
- recharged via the ergonomic charging dock.
- connect to your IPad, IPhone 4/5 or Samsung Galaxy 3/4 (optional adapter).
- DL3-N model available with Pigment Boost button for warmer illumination.
**DermLite II Hybrid M**  *Bright Polarised Dermoscopy*

DermLite II Hybrid M is the first dermatoscope that combines non-polarised immersion fluid dermoscopy with cross-polarised dry dermoscopy.

The DermLite II Hybrid M is the choice for medical professionals who value the unique advantages of cross-polarised dermoscopy as well as traditional skin examination using immersion fluids.

**DermLite II Pro**  *Dual-Polarisation Imaging*

DermLite II Pro offers both cross-polarisation and surface polarisation imaging in one device. DermLite II pro allows you to choose between a group of 16 linearly polarised LEDs for surface visualisation of superficial structures and a second group of 16 cross-polarised LEDs for viewing deeper pigmentation.

**DermLite II Fluid**  *Traditional Dermoscopy*

DermLite II Fluid is dedicated to traditional immersion fluid dermoscopy. Setting new benchmarks in this established category, this powerful scope offers the most light of any comparable device with a maximum output of over 2000 footcandles from 32 LEDs, the largest lens, button-activated light intensity adjustment, as well as an integrated, rechargeable lithium-ion battery – all in one hand-held device.

**DermLite II Multispectral**

*The colourful future of early skin cancer detection*

DermLite II Multispectral is the world’s first pocket dermatoscope with four-color epiluminescence.

With this innovative technology, you have the unparalleled ability to optically dissect skin cancer using different frequencies of light – ranging from white light epiluminescence to surface pigmentation using blue light to superficial vascularity under yellow light and to the deeper pigmentation and vascularity with red light. With its fixed cross-polarisation system and 32 bright-white LEDs – eight per color – DermLite II Multispectral is the most innovative and accessible colour-based dermoscopy tool for advanced skin cancer imaging.
**DermLite FOTO**  *Turn your camera into a high-end dermoscopy system*

The extremely compact DermLite FOTO integrates state-of-the-art cross-polarisation system, 24 bright-white light emitting diodes (LEDs) for natural illumination and a high quality four-element compound lens to create an epiluminescence microscopy imaging system capable of capturing skin lesion images with superb clarity and detail.

Combine the DermLite Foto with your digital camera, video camcorder or commercially available SLR camera and you have everything you need to record high-definition images. DermLite FOTO is entirely portable and comes with an internal battery for hours of untethered digital dermoscopy.

**Lumio**  *General Skin Examination - Polarised Light*

Lumio is the ideal device for general skin exams. With its 75mm lens offering 2x magnification and powerful cross-polarisation, Lumio is an excellent tool for a variety of dermatological exams.

Lumio is a great tool for a variety of dermatological exams: Varicose veins, pigmented skin lesions, hair follicles and much more.

**Lumio S Polarised & Non-Polarised Examination**

The Lumio S has 40 mm lens producing 4x magnification. This innovative device hits the sweet spot between large-area, low magnification and the close ups of a dermoscopic image. The Lumio S is controlled by touch.

Its ergonomic soft-touch body provides a comfortable, secure grip, and its Corning®Gorilla®Glass top and bottom surfaces are strong and scratch-resistant.

**DermLite DL1**  *The next generation of portability*

- The smallest dermatoscope currently manufactured
- Mobile, it clips to your shirt or sits in your pocket
- Same lens size as the DL100, 15mm wide width 10x zoom
- Cross-polarized and non-polarized modes
- Glass faceplate with 10mm scale for measurement
- Recharges from any laptop or PC via USB port
- Takes superb images with your iPhone 4/5 (adapter included)

**Lumio S**  *Polarised & Non-Polarised Examination*

The Lumio S has 40 mm lens producing 4x magnification. This innovative device hits the sweet spot between large-area, low magnification and the close ups of a dermoscopic image. The Lumio S is controlled by touch.

Its ergonomic soft-touch body provides a comfortable, secure grip, and its Corning®Gorilla®Glass top and bottom surfaces are strong and scratch-resistant.

**DermLite DL1**  *The next generation of portability*

- The smallest dermatoscope currently manufactured
- Mobile, it clips to your shirt or sits in your pocket
- Same lens size as the DL100, 15mm wide width 10x zoom
- Cross-polarized and non-polarized modes
- Glass faceplate with 10mm scale for measurement
- Recharges from any laptop or PC via USB port
- Takes superb images with your iPhone 4/5 (adapter included)
DermLite Accessories

**DermLite II/3 Camera/Tube Sets**
*Connect Your Dermlite for Image Capture*

We sell a range of ready to use cameras with the correct ring and adapter sets to allow you to connect your Dermlite II or 3 model to capture images. Your current camera model may also be compatible. Please contact us for further information.

**Lumio S Charging Pad**

The ideal accessory for Lumio S, this innovative pad charges your device using inductive technology. Simply place Charging Pad onto a flat surface and place your Lumio S examination device on top. You can even mount the pad to your office wall so that it is within convenient reach without taking up valuable space.

**DermLite IPhone 4 & 5 Connection Kit**

Capture dermoscopic images on your IPhone 4/5 model, by using this specially designed case to connect any Dermlite II or Dermlite DL3 model.

**DermLite Galaxy S3/S4 Connection Kit**

The Dermlite Galaxy S3/S4 case leaves your device's jacks and buttons accessible and is no bulkier than most consumer-grade cases. Add its superior scratch and impact protection to the list of reasons why you can keep it attached to your S3/S4 all the time, even when you are not doing dermoscopy.

**DermLite iPad Mini Connection Kit**

Snap this durable polycarbonate case onto your iPad and thread the 28 mm adapter ring onto your DermLite 2 or DL3 to start taking dermoscopic images with your Pad mini.

**DermLite iPad 3 & 4 Connection Kit**

Compatible with iPad 2 and new iPad (3rd & 4th generation) and can be attached to any Dermlite DL1, DL2 or DL3.
Palm Bladder Scanner PBSV
Portable, lightweight and easy to carry

Palm Bladder Scanner (PBS) is a safe non-invasive device to measure bladder volume which uses advanced three dimensional ultrasound technology.

- Light weight and easy to carry
- 8 inch LCD screen
- External printer which allows direct printing of measured results
- Easy to upload results to PC with USB
- Software Upgrades available online
- Long lasting lithium battery

VitaScan LT USB Bladder Scanner
Three dimensional ultrasound technology

VitaScan LT is applicable in many clinical areas to determine bladder volume, time for bladder emptying and detection of post void residual (PVR).

VitaScan LT calculates patient’s bladder volume in multiple planes and displays volume and bladder image on screen.

- Real-time Ultrasound bladder monitor
- 3D ultrasound probe through PC running windows
- USB ultrasound probe connections
- Simple and intuitive to use. User interaction through touch screen
- On-board video tutorial
- PreScan mode provided for easy and precise location of the urinary bladder
- Scan modes provided for a variety of patient types including women, men and obese patients
- Bladder volume calculations in large digits
- View and save exams easily, creating EMRs for your patients
- Software to interface patient electronic journal
- Software updates via USB/Flash drive
- Optional mobile cart with locking wheel
PulseOx 5500  *Finger Pulse Oximeter*

- Easy to use, all in one, integrated finger device
- 1,000 hour battery life
- Minimal maintenance costs
- Automatically turns on and off
- Back light illumination
- Durable and attractive design

PulseOx 6100  *Hand Held Pulse Oximeter (Adult & Child)*

- AutoSpot™ technology for motion artifacts and low perfusion
- Low power consumption, no need for frequent battery replacement
- Memory capabilities to store readings
- Turns off automatically
- Nail polish tolerant
- Interchangeable pediatric thimble option
- Replacement sensors available (adult/pediatric)
- Back light illumination
- Attractive and durable design

PulseOx 7500  *Pulse Oximeter with Overnight Monitoring*

The PulseOx 7500™ Wristwatch Recording System offers the features of a conventional oximeter in a compact, user-friendly wrist-based configuration. The PulseOx 7500™ accurately measures blood oxygen saturation levels and heart rate. Readings are displayed and stored within a unit that sits comfortably on the patient’s wrist for maximum convenience and flexibility.

The PulseOx™ Wristwatch Recording System uses Reflective Pulse Oximetry Technology (RPO) for accurate measurements of blood oxygen saturation levels and heart rate. It also addresses problems typically associated with motion artifacts, ensuring accurate and reliable readings. The unit is designed to utilise very low power for extended usage, eliminating the need for frequent battery replacement.

USB cable & software included for PC transfer and report generation.
Omron Compressor Nebulizer NE-C28/C29
For efficient respiratory therapy

- No need to remove mouth piece during exhalation with Omron V.V.T nebuliser kit
- Efficient delivery of medication
- High nebulisation rate ensures optimised treatment duration
- Autoclavable nebuliser-kit
- Easy to operate and maintain with safe and easy-to-clean new nebuliser kit
- NE-C29 model also available with storage compartment

Omron Mesh Nebulizer NE-U22
Mesh Technology for Effective Nebulization

- Generates very fine mist
- Ensures medications reach deep into the respiratory tract
- Nebulisation at any angle
- Can inhale at any angle, even when tilted or lying down
- Very Quiet Operation
- Suitable for home, clinic, or outdoor use and inhalation at night
- Lightweight and compact, easy to take along anywhere

Omron TH839S Instant Ear Thermometer

- 1 second quick measurement
- Fever Alarm with beeper
- Selectable C or F
- 9 sets of memory
- Ergonomic design for easy handling
- 2 year warranty
- Compatible probe covers (TH839S/40)

Omron MC-341/343 Thermometer

- Fast 10 second digital readings*
- Professional accuracy
- Reading recall/ Water resistant
- Beep on completion
- Automatic shut-off
- Readable in C and F degrees
- Oral, rectal, underarm use

No Touch Thermometer

- Scans the temple without contact
- Non-invasive
- Fast measuring within seconds
- 8 memory recall
- Built-in protective sensor cover
- Measurement taken up to 10cm

*10 second reading for rectal use.
Omron HCG-801S Hand Held ECG Unit

- Direct review of results on high resolution screen with backlight
- Single Channel ECG lead
- Portable and Compact
- Very user-friendly and economically priced
- Low power consumption and cordless unit
- PC download through SD memory for 300 date & time stamped measurements

Comen CM12
PC USB Based Electrocardiograph

- PC ECG Data Adapter (collection system for signal amplification) - external USB data adapter
- Special-purpose PC ECG workstation software
- Used together with a PC or Laptop
- 12-lead Arrhythmia Analysis
- Accurate ST-T analysis
- Automatic calculation of ischemia area
- QT Analysis function
- HRV Analysis
- Pace-make detection, anti-defibrillation
- Multiple output format for doctors to choose, or it can be user-defined
- Leads Connection Status

Comen CM300
3-Channel Electrocardiograph

- High resolution LCD screen 320 x 240
- 12-lead ECG simultaneous acquisition
- Built-in 80mm thermal printing mechanism
- Lead status indicator
- Complete digital filters, resisting baseline drift
- Automatic ECG measurement and interpretation
- 3 printing modes (Auto, Manual & Rhythm) selectable
- 1 / 2 / 3 channel ECG waveform & rhythm leads recorded out
- 150 Electrocardiograms in internal memory
- Optional Network Capability, Data import/output by USB
**Comen CM600 - 6 Channel Electrocardiograph**

- 5.7 inch TFT LCD screen
- Alphanumeric keyboard
- Automatic measurement and interpretation
- 300 ECG internal memory
- Last 120 seconds 12-lead waveforms reviewable & recordable
- 110mm Z-folded thermal recording paper
- External printer & data transmission support by USB port
- Optional Network Capability

**Comen CM1200A - 12 Channel Electrocardiograph**

- 8.4 inch (resolution: 800* 600) colour TFT touch screen
- Preview before printing
- 12-lead acquisition & amplification, 12 ECG waveforms recording simultaneously, all-digital & full-floating design
- Manual / Auto / Rhythm working modes selectable
- Built-in battery to support uninterrupted working up to 2 hours
- 300 ECGs storage & review, capable to expand the internal memory by USB & transmit the Data by Net port
- Various printout formats, support 210mm, 216mm roll & Z-fold paper

**Comen CM1200 - 12 Channel Electrocardiograph**

- 12.1 inch TFT colour folding-up touch screen
- Alphanumeric keyboard, support hand-writing patient information input
- Pace-maker detection, anti-defibrillation
- Automatic measurement & interpretation
- 10,000 ECG internal memory
- 122 kinds of diagnosis results
- Last 120 seconds 12-lead waveforms reviewable & recordable
- Various printout formats, support 210mm, 216mm roll & Z-fold paper
- External printer & data transmission support by USB port
- Optional Network Capability
**Comen STAR 8000 Multi-Parameter Patient Monitor**

- Easy operation, suitable for general wards monitoring
- Special trim knob position, NIBP dust shield design
- Large alarm light, 3-level audio/visual alarm
- Single-level menu selection for all settings
- Built-in rechargeable battery - 4 hours
- 12.1" LCD screen

**Comen STAR 8000C Multi-Parameter Patient Monitor**

- 12.1 inch Large-screen colour TFT display with maximum 9 waveforms
- 120 hours graphic and tabular trends of all parameters
- $\text{SpO}_2$ pulse-tone modulation (Pitch Tone)
- 1000 group lists of NIBP storage and review
- Optional 12 ECG waveforms display and analysis
- Optional Respironnics side stream and mainstream $\text{EtCO}_2$ measurement for accurate measurement of insuslated and non-insuslated patients
- Optional Nellcor OxiMax / COMEN $\text{SpO}_2$

**Comen STAR 8000D Multi-Parameter Patient Monitor**

- 12.1 inch Colour TFT Screen
- 5 ECG waveforms display simultaneously
- Arrhythmia and S-T segment analysis, drug dose calculation
- Manual, Automatic, Alarming recording modes
- 3-Level audio/visual alarm, alarm limit display
- Built-in rechargeable li-ion battery
**Comen C50 High Level Patient Monitor**

- 4000mAh Li-ion Batteries - 4 Hours working time
- Interfaces: SD card, USB network, VGA
- IPX1 level waterproof design
- RESP Apnoea Alarm, OxyCRG
- 10.4” TFT Touch Screen
- Special NIBP socket & 5-lead ECG

**Comen C80 ICU/CCU/OR Patient Monitor**

- IPX1 level waterproof cabinet design & sturdy housing
- Colour TFT display, touch screen
- Various interface: Standard display, Big font display, 9 waveforms display, trends graph display, OxyCRG display, Dual view display
- Multi-language and handwriting support
- NIBP socket dust shield
- 7-Lead ECG or 12-lead ECG analysis
- EtCO2 socket reserved, support hot plugging
- Arrhythmia, S-T segment analysis, drug dose calculation
- Pacemaker detection, Anti-defibrillate
- External monitor connector (VGA output)
- 120 hours trends graph recall, 120 hours trends table recall, 1000 groups of NIBP list, 500 alarm events
- 3-level audio/visual alarm, alarm limit display
- AC/DC power supply, pluggable built-in rechargeable battery, power-off data protection
- Multiple expansion bays for SD socket, USB socket or Network socket

**Comen C60 Neonatal Patient Monitor**

- Unique Neonatal Apnoea Self-saving function, by using the specialised Vibro Acoustic Simulator
- OxiMax® SpO₂ SYSTEM, SatSeconds™ intelligent alarm management technology
- Optional Oxygen Concentration Sensor to monitor variation of the Incubator
- 96-hours trends graph & table recall, 400-groups of NIBP list, 60 alarm
- Adap-DSP™ technology to ensure accurate NIBP measurement
- ExNeo™ ECG technology for precise ECG measurement
- Specialised accessories for newborn babies
- 8.4” touch screen
Spirotube PC Based Spirometry

Spirotube is intended for any doctor, from a family doctor to a specialist, requiring a small and compact instrument able to make a full spirometry test.

The sensor for flow and volume measurement is a system based on the WaveFront™ ultrasonic multiple-path principle. This principle guarantees accuracy plus reproducibility of the measurement.

- Reusable turbine
- Download data to PC
- Pulmonary function diagnostics
- Automatic internal calibration

SpiroThor Mobile Handheld Spirometer

SpiroThor is a pulmonary function diagnostics and monitoring device. SpiroThor is suitable for screening COPD and asthma.

- Reusable turbine
- Download data to PC
- Pulmonary function diagnostics
- Automatic internal calibration

SpiroTube Mobile Edition - Bluetooth Spirometer

SpiroTube Mobile Edition is a pulmonary function diagnostics and monitoring device with bluetooth communication interface and built in battery.

- Built-in automatic internal calibration
- Diagnostic decision support system
- Diagnostic decision support system
- Innovative diagnostic visualisation
- Zero Cross-contamination (easy to disinfect)
**Omron HEM-7200 Auto Blood Pressure Monitor**
- Intellisense Inflation, Faster and More Accurate
- Blood Pressure Level Indicator
- Detects Irregular Heartbeat
- Detects body movement
- Memory for 60 sets of readings with date and time
- Displays average of last three readings taken within last 10 minutes

**Heartsure BP100 Auto Blood Pressure Monitor**
- Hypertension Indicator & Pulse Display
- Automatic Inflation and Deflation
- One Touch Operation
- 14 Reading Memory Function
- 2 Year Warranty
- Standard Medium Sized Cuff

**Omron HEM-7221 Blood Pressure Monitor**
- Dual check for accurate reading
- Cuff wrapping guide to indicate that the cuff has been correctly fitted
- Detects Irregular heartbeat
- Hypertension indicator alerts if reading exceeds international guidelines
- Advanced Averaging displays average of last 3 reading within 10 min

**Omron HEM-7203 Automatic Monitor**
- Accurate measurements with Intellisense™ technology
- Memory for 30 sets of reading with date and time
- Displays average of last 3 readings taken within 10 minutes
- Long battery life- measures up to 1500 times
- Large and clear display-easy to read

**Omron Blood Pressure Monitor Accessories**

**General Models:**
- Small Cuff for all Upper Arm Models OMNIBP-09 $30.86 + GST
- Medium Cuff for all Upper Arm Models OMNIBP-10 $31.77 + GST
- Large Cuff for all Upper Arm Models OMNIBP-11 $31.77 + GST
- AC Adapter for all Upper Arm Models OMNIBP-12 $27.50 + GST
- IA1 Small Medium Cuff OMNIBP-19 $33.60 + GST
- IA1B/HEM -7221 Medium Large Cuff OMNIBP-18 $33.60 + GST
**Omron T9P/T9IT Automatic Blood Pressure Monitor**

- Deflation control for last measurement
- 28 sets memory with date and time
- Detachable printer for convenient printing at any time
- Print-outs with date, time, average reading and graphics
- Computer interface option to link to your computer

**T9P Model - Blood Pressure Unit and Printer**  
**T9IT Model - Blood Pressure Unit and PC Link/Software**

**Omron HEM-4030 Manual Blood Pressure Monitor**

- Manual Inflation
- Large display, easy to read
- Displays average of last 3 readings taken within 10 minutes
- Durable fan-shaped cuff
- 21 sets memory with date and time

**Omron REM-1 Wrist Blood Pressure Monitor**

- Fully automatic inflation and deflation
- Large display, easy to read
- Displays average of last 3 readings
- Memory for 40 sets of readings

Omron HEM-907 Professional Blood Pressure Monitor

- Accurate measurements with Intellisense™ technology
- 3 standard cuff sizes from 17cm up to 42cm arm circumference
- Manual or automatic measurement mode
- Interval time between readings between 5 sec and 3 min
- Displays average of last 3 readings
- Optional trolley, wall or pole mounting kit

Omron HBP-1300 Blood Pressure Monitor

- Fully automatic or preset inflation - Oscillometric measurement.
- Out of range indicator (Oscillometric measurements).
- Irregular heartbeat indicator. & Last measurement recall.
- 3 standard cuff sizes from 17cm up to 42cm arm circumference.
- Auscultatory mode for inflation and manual measurement with stethoscope.
- Optional Extra Small & Extra Large Cuffs.

Omron Ambulatory Blood Pressure Monitor M24/7

- Fully automatic blood pressure monitor
- Measurement capacity for 48 hrs
- Memory capacity of more than 400 readings
- Fully programmable with windows software for full analysis and data management
- Lightweight design and quiet operation for patient compliance
- Large LCD display for easy reading
- BHS clinically validated

Each unit is supplied with the following accessories:

- 2 Neoprene (latex-free) cuffs with hand-washable sleeves: normal (24–32cm) and large size (32–42cm)
- Blood Pressure tracker software, and Optical USB PC cable
- Carry pouch and 2 Sets of batteries

HEM-907 Accessories Only:

- Bladder for Small Cuff: OMHEMP-01 $13.70 + GST
- Bladder for Medium Cuff: OMHEMP-02 $14.30 + GST
- Bladder for Large Cuff: OMHEMP-03 $19.80 + GST
- Small Cuff 17 - 22cm: OMHEMP-04 $13.70 + GST
- Medium Cuff 22 - 32cm: OMHEMP-05 $14.30 + GST
- Large Cuff 32 - 42cm: OMHEMP-06 $23.10 + GST
- Mobile Trolley Stand: OMHEMP-09 $315.00 + GST
- Battery Pack: OMHEMP-12 $38.00 + GST
- AC Adapter: OMHEMP-13 $56.00 + GST

HBP-1300 Accessories Only:

- Extra Small Cuff 12 - 18cm: OMNIBP-32 $50.70 + GST
- Small Cuff 17 - 22cm: OMNIBP-33 $60.70 + GST

**Health-O-Meter 500KL Eye Level Digital**

- Capacity: 500 lb / 220 kg
- Resolution: 0.2 lb / 0.1 kg
- EMR connectivity via USB
- 1” LCD display
- Functions: LB / KG conversion, LB / KG lockout, Body Mass Index (BMI), Zero Out / Tare, Hold / Release, Auto Zero, Auto Off
- Platform Size: 12 3/4” (w) x 15 1/2” (d)
- Height Rod: 30” - 84 1/4” / 76 cm - 214 cm
- (2) Wheels for ease of movement
- 6 AA batteries included, Optional 120V adapter
- 2 Year Warranty

**Health-O-Meter 844KL Digital Floor Scale for Telemedicine**

- Capacity: 440 lb / 200 kg
- Resolution: 0.1 lb / 0.05 kg
- Connectivity via USB
- 1-1/4” LCD display
- Functions: LB / KG conversion, Auto Zero, Auto Off
- Initial Add On Weighing Option
- Platform Size: 12-5/8” (w) x 12-1/2” (d)
- (2) 3-Volt Lithium batteries included
- Optional Carrying Case Available
- 1 Year Warranty

**Health-O-Meter 752KL Heavy Duty Remote Display Digital Scale**

- Capacity: 600 lb / 272 kg
- Resolution: 0.2 lb / 0.1 kg
- EMR connectivity via USB
- Easy to read 1” LCD display
- Remote Indicator can be placed on table, mounted on a wall or held by the operator
- Functions: LB / KG conversion, LB / KG lockout, Body Mass Index (BMI), Zero Out / Tare, Hold / Release, Auto Zero, Auto Off
- Platform Size: 14-3/4” (w) x 14-11/16” (d)
- 120V adapter included, 6 C-cell batteries not included
- Optional Wall Mounted Height Rod available
- 2 Year Limited Warranty
**Health-O-Meter 553KL Digital Tray Scale**

- Capacity: 44 lb / 20 kg & Resolution: 0.5 oz / 10 g
- EMR connectivity via USB
- 1”LCD display
- Functions: LB / KG Conversion, LB / KG
  Lock Out, Zero Out / Tare, Hold / Release,
  Auto Zero, Auto Off
- Tray Size: 25” (w) x 13-7/8” (d) x 2” (h)
- Measuring tape: 0” - 24” / 0 cm - 58 cm
- 6 AA batteries included, optional poweradapter
- Optional carrying case & Rolling Scale Cart
- 2 Year Warranty

**Health-O-Meter Dial Scale**

- Capacity: 180 kg
- Large, easy read dial face
- Graduation: 1 kg
- 8” dial (raised 4”) & Platform Size: 11-1/2” (w) x 13” (d)
- Large footprint
- 1 Year warranty

**Omron HN283 Digital Scale**

- Measures Body Weight up to 150kg
- Measures weight in increments of 100g
- 4 Sensor Accuracy Technology
- Automatic ON/OFF Function
- Weight measurement 5kg –150kg
- Tempered glass for safety

**Omron HBF202 Body Analyser Scale**

- Body Fat Percentage
- Body Mass Index (BMI) & Body Weight
- Resting Metabolism
- Visceral Fat Level
- Skeletal Muscle Percentage
- 4 Person Profile with previous measurement results
- Large LCD display
- 4xAA batteries included - on/off switch at the base
**Omron HV-F128 TENS Therapy**

- Relief of pain
- Management of muscular injuries
- 12 Automatic therapy modes
- LCD panel shows frequency and time remaining of therapy
- High frequency stimulation to relieve pain quickly
- Single channel device

**Omron HV-F127 TENS Therapy**

- Relief of pain
- Management of muscular injuries
- 9 Automatic therapy modes
- Low frequency stimulation to relieve muscle tension
- Single channel device

**Omron HJ-203 Pedometer**

- Step Counter
- Activity Mode - for interval measurement
- Calories Burnt
- Fat Burnt
- Distance Walked
- 7 Day Memory
- Activity Mode

**Omron HJ-005 Pedometer**

- Instant feedback on your exercise
- Step counter
- Extra large screen size
- Solid belt clip
Nidek Model 905

- Quiet Operation - less than 47 dBA
- Lightweight - 22.7 kg - Easy to Transport and Maneuver
- Slender & Sleek Cabinet Design with Integrated Handles
- Quick Snap Rear Panel allows easy access to filter, hourmeter & battery
- Superior Grade Molecular Sieve
- Patented Maintenance Free Rotary Poppet Valve
- Exclusive Moisture Reducing Wick Assembly
- Reinforced Base Substructure to guard against breakage
- Humidifier bottle provided for optional use
- Patented Rapid Pressure Stream Absorption (RPSA) Technology
- Simple design, with 1/3 fewer parts than previous model

Nidek Model 925

- “Lite” - only 13.6 kg
- Quiet Operation - less than 40 dBA
- Compact
- Lockable Flow Control Valve
- Litre Flow - 0.125 to 5 Litre/min
